Subject: Microsoft Settlement

Pursuant to the Tunney Act, I wish to submit my comments regarding the Proposed Final Judgement for the Microsoft Settlement.

I do not feel that the Proposed Final Judgement goes far enough, or even truly makes a reasonable attempt at slowing Microsoft's anti-competitive practices, more less stopping them all together. I would like to see a final settlement with Microsoft at least stop their current, ongoing, rampant monopolistic behavior, and ideally punish them for having behaved like that. The current proposed settlement does neither, due to the phrasing of many paragraphs in the settlement giving Microsoft numerous loopholes to escape the already loose restrictions. As it has shown in the past with previous injunctions, Microsoft has the resources and the desire to do just this, and will do it again.
